

COLLEGE OF  
DENTURISTS  
OF ONTARIO

## Practice Advisory

### Medical Devices and Health Canada Licensure

September 12, 2019

Dear Member,

The College's mandate is to protect the public by ensuring Registered Denturists provide safe, ethical and competent denturism care and service. The opening of the global marketplace and the development of innovative technologies have provided Registered Denturists with the opportunity to source novel products, devices and materials manufactured both in and outside of Canada. While the College's goal is not to interrupt innovation in the marketplace, it does have as its primary responsibilities the protection of public safety and compliance of Registered Denturists with existing regulations for medical devices.

This practice advisory is intended to provide Registered Denturists with information on navigating the use, sale and licensure of medical devices in Canada.

**[Practice Advisory: Medical Devices and Health Canada Licensure](#)**

## Questions?
