Chart Stimulated Recall Pilot Test

Call for Volunteers

What is it?

Last Fall, a group of Registered Denturists developed the [Chart-Stimulated Recall Questionnaire](#).

Using the patient chart as the framework in which the conversation between the Peer Assessor and the Registered Denturist takes place, the Chart Stimulated Recall Questionnaire will eventually be incorporated into the Peer and Practice Assessment process.

The Quality Assurance Committee is currently seeking members of the profession to volunteer to assist in the development and validation of this questionnaire by participating in a discussion with a Peer Assessor using the Chart-Stimulated Recall Questionnaire.

What is involved?

The pilot test of the Questionnaire will begin in March. Participants will select 4 of their own patient charts that represent a variety of clinical patient scenarios. A Peer Assessor will use the questionnaire to guide the discussion for each file. Each patient file will take approximately 15-30 minutes to discuss.

A follow up survey will be circulated to participants to gather feedback.

Participation

Participation in the pilot session will qualify for CPD credits. There are limited spots available so sign up today! Click [HERE](#) to sign up! Thanks in advance for supporting the important work of the Quality Assurance Committee!
