Ontario Launches Online Health Workforce Matching Portal

April 8, 2020

The Government of Ontario has launched an online portal to match available health care workers with employers.

The new Health Workforce Matching Portal will enable health care providers with a range of experience to join the province's response to COVID-19. Those providers include retired or non-active health care professionals, internationally educated health care professionals, students, and volunteers with health care experience. The portal will efficiently match the availability and skillsets of frontline health care workers to the employers in need of assistance to perform a variety of public health functions, such as case and contact management.

Click [here](#) to visit the online portal.

The Government of Ontario has provided the following resources to better assist you in navigating the portal:
