DENTURISTS
OF ONTARIO

NEW! Peer Circles

Call for Participation - Item Writers

September 25, 2017

The Quality Assurance Committee of the College invites members of the profession to participate in the development and implementation of the new and exciting Peer Circle project - one of the newest Continuing Professional Development activities being developed for the College's Quality Assurance Program!

The goal of this project is to provide denturists with a rewarding opportunity to work together in a group to address challenging practice issues and develop enhanced problem-solving approaches and strategies to meet these challenges.

Peer Circles typically involve 10 practitioners and a group facilitator. The facilitator, who is a practising denturist, is trained to assist the group in developing problem-solving skills and strategies within the context of a topical case or issue.

The first phase of development of this innovative project is to construct the cases that will be the focus of the Peer Circle discussions. The Quality Assurance Committee is pleased to be seeking members of the profession who are interested in participating in the development of the cases.

Participating in case development will involve attending 2 training and development workshops (**November 11-12th**, **AND December 1-2nd**, **9:00am-4:00pm**) at the College office in Toronto. These workshops will involve training in how to write cases as well as actual case development.

All travel and accommodation expenses will be covered. In addition, the College will pay those members attending the workshop a per diem for each day of attendance. The Quality Assurance Committee sincerely hopes that you will give this request for participation in the work of your College serious consideration.

If you are interested in participating in this unique opportunity to develop the College's new Peer Circle pilot project, please indicate your interest by contacting Jennifer Slabodkin, Manager, Registration, Quality Assurance and Policy at jslabodkin@denturists-cdo.com or by phone: 416-925-6331 ext. 224.
